### About me

I'm a dedicated developer with experience in various areas of software development since 2020. My primary focus is on web systems and development, where I am passionate about discovering innovative solutions and strategies to optimize processes and improve products.

I'm committed to growing as a leading developer, known for my ability to share knowledge and make a meaningful impact on every organization I collaborate with.

My goal is to continuously contribute to the success of my team and advance the field through both technical excellence and effective knowledge sharing.

### Skills & Tools

#### MAIN TECHNOLOGIES

Vue.js

React

Next.js

Typescript

#### LANGUAGES

**Portuguese** | Fluent/Native

**English** | Advanced

### Experiences

**Globo** - Software Developer

July 2023 – Current

#### Description:

- My primary focus is on enhancing the system by developing new features and optimizing existing tools to ensure peak performance and functionality. I'm involved in all stages of the development process, from initial design to deployment and maintenance.

**Tools that I use:** Golang, JavaScript, TypeScript, Python, React, React Native, Vue.js, Node.js, MongoDB, MySQL, Docker, Swagger and Jira.

## **EstrelaBet** - Software Developer / Front End

June 2022 – July 2023

### **Description:**

- In my role as a developer, I played a key part in maintaining and enhancing our internal system, crucial for managing payments, player engagement, and the affiliate program.
- Using React and Vue.js, I developed and optimized user interfaces for a smooth and intuitive experience. I also leveraged React Native to improve our mobile applications, ensuring they were robust and user-friendly.
- Additionally, I significantly contributed to the design and optimization of our affiliate program. I created scalable solutions that supported numerous affiliates, enhancing their operational efficiency and communication. My work ensured the program's functionality, adaptability, and overall success.

**Tools that I use:** React, React Native, Vue.js, CSS, Typescript, MongoDB and SQL.

---

## **Grupo SX** - Software Developer / Front End

June 2021 – July 2022

### **Description:**

- My primary focus is on enhancing the system by adding new features and updating existing tools to ensure optimal performance and functionality. I'm involved in all stages of the development process, contributing to system development and improvement.

**Tools that I use:** Golang, JavaScript, TypeScript, React, React Native, Vue.js, Node.js, Python, MongoDB, MySQL, Docker, Swagger and Jira.

---

## **upFlow.me** - Software Analyst

Feb 2020 – June 2021

### **Description:**

- I played a key role in optimizing and enhancing our internal systems. My responsibilities included analyzing system requirements, designing and implementing solutions to improve functionality and efficiency, and working with cross-functional teams for seamless integration.
- I evaluated and integrated technologies to meet evolving business needs, developed and maintained systems for data management, process automation, and user interaction enhancement.
- My contributions focused on delivering actionable insights, driving system improvements, and aligning technological solutions with business goals.

**Tools that I use:** Vue.js, React, React Native, Next.js, TypeScript, HTML 5, CSS, MongoDB and MySQL.

Description:

- During my time as a Trainee at Sagendra, I gained practical experience across various facets of software development and system analysis. I actively contributed to projects where I applied my theoretical knowledge to real-world situations.
- My role involved supporting senior developers with coding tasks, engaging in code reviews, and assisting in the design and implementation of new features. I also played a key role in debugging and troubleshooting, developing skills to effectively address technical challenges.
- This hands-on experience provided me with a strong foundation in software engineering principles and best practices, equipping me for more advanced roles in the field.

**Tools that I use:** Javascript, Typescript, Python, HTML5, MySQL, CSS, Design Patterns and MongoDB.

---

Education

UNA	Technologist Degree in Analysis and Development of Systems	2025
UFMG	Bacharelor’s Degree in Mathematics and Computer Science	2023
